

# Ruqayyah Alabi

Software Developer(frontend)

I am a dedicated software developer with a passion for crafting reusable code that aligns with user stories. Currently seeking an internship role where I can leverage my problem-solving and decision-making skills to identify customer needs and deliver effective solutions, contributing to the company's mission. Proficient in self-management during independent projects, I also excel in collaborative team environments. I am open to taking on additional responsibilities to ensure the team meets its goals. Eager to enhance my programming experience in a challenging and goal-oriented work environment, I am committed to contributing meaningfully to the success of the organization.
